Response to Amendment

1. The indicated allowability of claim 15 is withdrawn in view of the newly discovered references to Clark. Rejections based on the newly cited reference follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 15 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Clark US Patent Number 2731061; newly cited).

The casing 20 is reinforced with a fabric. The term “tightly” woven is relative and the rubberized fabric of Clark is considered to be tightly woven.

4. Claim 41 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Anderson et al (newly cited).

The insert casing 6, being reinforced by wires 7' and 8, is considered to be inelastic.

Allowable Subject Matter

5. Claims 9 and 17-40 are allowable over the prior art of record.

Response to Arguments

6. Applicant's arguments with respect to claim 15 have been considered but are moot in view of the new grounds of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other insert casings.
